

SOFTWARE DEVELOPER

Mind the Byte is a bioinformatics company that develops and provides software for drug discovery using Artificial Intelligence and Big Data approaches. We work with partners on a consultancy basis and also, offer an easy-to-use Software as a Service package. Overall, our software allows clients to apply High-performance computing platform on a flexible pay-per-use basis without investment in hardware or software licenses as part of their drug development process.

We are looking for a highly motivated and proactive person with a strong interest in learning and participating in an innovative and growing environment. This person will work as Software Developer at the R&D department.

REQUIREMENTS:

- Degree in Software Engineering or equivalent.
- Proficiency level in web development frameworks, particularly in Nodejs/React. Django experience is valuable.
- Proficiency level programming with Python and JavaScript.
- Secure programming concepts and experience using Linux and GIT.
- Previous experience in real production environments and continuous deployment.
- At least two years of experience in similar positions.
- Knowledge in UX and web frontend design (CSS, HTML) is a plus.

MAIN RESPONSIBILITIES:

- Full-stack development following SCRUM methodologies.
- Problem solving, testing, validation and debugging.

WE OFFER:

- Full time and indefinite contract with a probation period.
- Flexible working conditions in an exciting and growing environment.
- Personal development plan.
- Extraordinary location in our headquarters in Barcelona.
